# St. Ignatius of Loyola

Founder of the Society of Jesus

"For whoever would save his life will lose it, and whoever loses his life for my sake will find it. For what will it profit a man, if he gains the whole world and forfeits his life?" (Mt. 16:25-26)

## His Prayer of Generosity:

My Lord teach me to be generous!  
Teach me to serve you as you deserve  
to give and not to count the cost...  
to fight and not to heed the wounds...  
to toil and not to seek for rest ...  
to labour and not to ask for any reward,  
save that of knowing that I am doing your will.

## *From Principal's Desk*

Loyola College, a Catholic minority institution affiliated to Sant Gahira Guru University, Ambikapur, is located at Kunkuri, Dt. Jashpur, C.G., which is a semi-urban area. It was founded by Loyola Jesuit Society, Kunkuri in 2005. It is totally a self-financing College. Loyola College is run by the Society of Jesus which runs the leading education institutions of the world. The motto of the College is 'Excellence and Transformation'. Excellence means best academic result and academic activities; transformation means being new person with good character and leadership which changes the society.

Our aim is to make this College a 'College with Difference'. Laboratories and other facilities of the College is one of the best in India as NAAC team declared in 2015. We have Automated library. We have good collaboration and networking with different national and international bodies of educational institutions, like All India Association of Christian Higher Education (AIACHE), International Association of Jesuit Universities (IAJU), Xavier Board for Higher Education (Xavier Board). We have almost MOU signed with the Indian Government for Skill Development programme. We have MOU signed with Holy Cross Women's College, Ambikapur, C.G., St. Thomas College, Bhillai, C.G, St. Xavier's College, Ranchi, Jharkhand, JMJ College for Women, Tenali, A.P., St. Vincent Pallotti College, Raipur, C.G. and St. Aloysius College, Jabalpur, M.P. The College has green campus with coconut, mango, Guava and Mahogany gardens. Also the College has Botanical and Herbal gardens. Rain water is harvested in two ponds. Coaching classes for PSC and IAS competition are held by Raipur based 'Shikhar' Coaching Centre. Last year result (2019-20) was hundred percent and we expect same result in 2020-21.

The College stands for all-round development of the students. This is the reason it has so many co-curricular activities like, remedial classes, tutorial classes, Science exhibition, quiz competition, International workshops, National Seminars/webinars, Collaborative study, group study, peer group study and mentoring sessions; extra-curricular activities like, sports, cultural programme, skit and street play competition, Speech competition, extempore competition, talent hunt, etc. Loyola College has very valuable Extension programme as: Inter-religious celebration of all Major festivals of all religion together with citizens, Computer department is bringing Computer literacy to neighbouring college and schools. NSS is doing marvelous work. NSS students are fetching so many national and state level prizes for different level of competitions. During Corona lockdown NSS students under the supervision of SDMs of Kunkuri and Farsabaha Blocks helped the Government to maintain discipline. They promoted vaccination, mask use, hand wash and distancing. NSS has adopted a village called Nawatoli and teaching them to be hygienic free, literate, etc., There is tree plantation in the village every year. Department of Botany is taking care of a herbal garden and Botanical Garden.

I whole heartedly thank all the teaching and nonteaching staff members for their laborious and innovative activities in the College. I congratulate students for their success in various fields.

## ST. IGNATIUS OF LOYOLA

College is named after St. Ignatius of Loyola, a Saint who was born at Loyola in North Spain, in 1491. He at first pursued a military career. In 1521 in the battle of against King Francis I of France, he was struck by a canon shot that wounded one leg and broke the other. In the course of his convalescence at Loyola, he first read mundane literature, and when there was no more literature of this kind, he was given a book called "The Life of Christ" and another "The Flower of the Saints". After reading them regularly for quite some time he developed certain sympathy with what was written in them. He began to think: "What, if I were to do what blessed Francis did or what blessed Dominic did?" Slowly he was converted to a deep love of Christ and a missionary sense. He spent a year at Manresa in prayer, penance, serving the sick at the Hospital of St. Lucy and writing in substance the "Spiritual Exercises." He spent the next eleven years in studying Latin, Philosophy and Theology at Barcelona, Alcalá, Salamanca and Paris. He gathered a few companions to go as missionaries to the Holy Land and placed them at the disposal of the Pope. Such were the beginnings of the Society or Company of Jesus. Pope Paul III approved the Society in 1540. Ignatius died in 1556.

Ignatius was ablaze with fire to do greater things for God and the people. He kindled the hearts of many with this fire. The good services of the Society of Jesus spread all over the world, making a beginning in India in 1542, with the arrival of St. Francis Xavier, co-founder of the Society of Jesus in Goa. Its essential effort is in proclaiming to the world that unity and happiness lie in service.

## MADHYA PRADESH PROVINCE: THE SOCIETY OF JESUS

In its effort to extend service in various fields, the Society of Jesus, the M.P. Province in response to the demands of the people decided to open LOYOLA COLLEGE at Kunkuri in Jashpur District from July 2005 with the motto: "Excellence and Transformation". "The excellence consists in producing men and women of right principles personally appropriated, men and women open to the signs of the times, in tune with their cultural milieu and its problems, men and women for others."(Pedro Arrupe, S.J.). The kind of transformation we want to bring about rests on social, intellectual, spiritual and personal transformation.

## OWNERSHIP

Loyola College is established and administered by LOYOLA JESUIT SOCIETY, a charitable Society under the Articles 30(1) of the Constitution of India, primarily meant for Christian minorities. The College also caters to the educational needs of the others irrespective of caste and creed. ## PHYSICS LAB

“The principle of science, the definition almost, is the following; the test of all knowledge is experiment. Experiment is the soul judge of scientific truth. But what is the source of knowledge? Where do the laws that are to be tested come from? Experiment, itself, helps to produce these laws, in the sense that it give us hints. But also needed is imagination to create from these hints the great generalizations – to guess at the wonderful, simple, but very strange pattern beneath them all , and then to experiment to check again whether we made the right guess.....” Richard Feynman

Physics is a complex structure of concepts, hypothesis, theories and Observations that are interrelated in such a way that it is often difficult to separate inferences based on theories from direct observations based primarily on laboratories experiments. Student should understand that experimental evidence is the basis of our knowledge of the laws of physics and that physics is not merely a collection of equations and text book problems. In this context the Loyola College is known for its innovative teaching with practical subject combinations. The Department is delivering the quality education. The teachers are constantly interacting with students apart from classroom teaching, organizing weekly seminars and providing a lot of information about research and learning opportunities in and outside the country. We are constantly in touch with the new developments in the scientific world. Apart from a well-equipped lab, students are given practical exposure to field works and projects related to Physics.

## CHEMISTRY LAB

“Chemistry is the science which can see beyond the unseen, capable of analyzing even the composition of life, nature, air, water with proof while others merely theorize, analyze or dissect”. We breathe  $O_2$ , drink  $H_2O$  and sprinkle  $NaCl$  on our food. Each of these air, water and salt is a chemical compound, made from naturally occurring chemical elements. There are about 90 of these chemical building blocks that can be found in nature. Out of 90, 30 building blocks, nature can assemble millions of different substances. Chemists have studied how these substances are built and how their structures relate to their interactions

with other substances. The Department is trying its best to make students understand all these substances, to analyze substances out of the available raw materials and to predict the properties of a new compound before they go to their practical lab. Well-equipped laboratory consists of U.V-Visible Spectrophotometer, Melting point apparatus, Water bath, Oven, Chromatographic chamber, Electronic balance, Centrifuge apparatus, Gas facility, etc.

## BOTANY LAB

Nature reflects the creative work of living God. Green is the color of healing. Plants are the integral part of nature. They are designed with specific purpose. The physical beauty and its chemistry are of immense importance to human kind. There is a wonderful science in nature, in trees, herbs, roots and flowers which man has never discovered fully. Through our fully fledged Botany laboratory, Loyola Colleges effectively and efficiently brings about a basic attitudinal change towards nature through the teaching of Botany, which brings us closer to nature.

Our Botany laboratory is perfectly well equipped to cater the versatile experiments in taxonomy, physiology, embryology, microscopic experiments and studies as well as for the biochemical analysis, which offers hope of expanding knowledge. Under the able guidance of the teachers, the students make efforts to create an eco-friendly atmosphere in and around the campus.

## **MICROBIOLOGY & BIOTECHNOLOGY LAB**

No science can survive in solitary as none can survive without its potential application. This is the absolute law of nature and concept of survival. This concept has been well established and effectively shown in the form of fully fledged laboratory of Loyola College where a curiosity of a microbiologist is created in the form of research involving several long term and exhaustive experiments and then it is culminated in the form a biotechnology where every dream seen by the microbiologist is successfully converted into a fruitful industrial products, environmental remedy for human welfare. In Loyola College Microbiology and Biotechnology together continues to progress rapidly with the aid of new techniques, new research findings and new insights with microorganisms and their many activities. Lab is well equipped with laminar airflow, Electronic balance, Digital pH meter, UV-Visible spectrophotometer, BOD Incubator, Camera Lucida, Electrophoresis Unit, centrifuge, Colony Counter, Hot Plates, Oven, Compound Microscope, Binocular Microscope etc.

## **ZOOLOGY LAB**

Zoology is one of the basic subjects or rather say, one of the strongest pillars of life science. The animal kingdom probably contains more than 10 million different species; the vast majority still remains unidentified by scientists. As Loyola College is established in the center of the region with the miles miles stretch of untouched forest along with the dense biodiversity yet to be revealed, The Badalkhol Sanctuary, the smallest of its kind in the State of Chhattisgarh is situated in Jashpur district, not far from Kunkuri. It consists of endemic species and wide variety of Wild life. Hence special emphasis on the well-developed Zoology laboratory is well justified. As

this area is under research and need to be studied further, this is the future plan of this college. The Department is planning to promote research in the area of sericulture, pisciculture, and bee keeping. etc.

## **COMPUTER LAB**

Today, computer is the talk of the country from businessmen to employees, from engineers and scientists to school going children. In fact, the computer has a great impact directly or indirectly on our day-to-day life. Therefore, in order to bring particularly the people of this region in the mainstream of science and technology and also to compete with the other

parts of the country, Loyola College has 50 Pentium IV machines with the latest configuration also with the LAN and internet facility. A number of printers are also available including Laser and Dot Matrix Printers. The Department gives great importance from the very beginning of the academic year in view of total computer literacy of the students. Besides regular classes and practical, the students are given extra hours to enrich their knowledge of the computer science.

## **LIBRARY**

The library of Loyola College is automated. The library of Loyola College consists of more than 8000 books. It has an invaluable collection of books of different subjects. The library subscribes to the standard journals, magazines, newspapers, employment news, encyclopedia, career guidance books, competitive books and reference books. We follow open access system in our library for the convenience of the students and other users. Our College is has Internet facility in the library so that students can have easy access to down load materials related to the subjects.

## **GEOGRAPHY LAB**

## **ENVIRONMENTAL STUDIES**

Environment is the surrounding in which we live. It is said “a healthy mind resides in a healthy body,”. Environmental studies are a must to create awareness among students to cope with the environment along with its conservation and preservation mechanisms. Through this subject in Loyola we try to bring every student close to their environment by teaching them environmental ethics. Study of natural resources, environmental pollution, biodiversity and ecology is all about studying environment.

## **PHYSICAL EDUCATION**

Participation in games and sports is the best means of attaining fitness i.e. anatomical fitness and physiological fitness. It means that for proper growth and development of an individual the participation in games and sports is essential. Physical education is an education through physical activities for the development of the total personality of the person to his/her fullness and perfection in body, mind and spirit. Keeping in mind, Loyola College plays a vital role for the overall development of each and every student in this regard. The college has one basketball court, a volleyball court, two football fields, two hockey grounds, one badminton court, one table tennis board. We promote students according to their interests and potentials. The aim of our college is to raise the students up to National and International levels.
